BAYLEY Ladders and Ancillary Equipment

Today's hi-tech world demands the very best for a modern fire service. BAYLEY'S range of fire fighting ladders embraces both JCDD and BS EN1147 specifications to give the ultimate in choice.

The current BAYLEY range of JCDD and BS EN1147 compliant ladders is well established as standard equipment for all UK fire brigades and many overseas services. Ranging from 1.8m up to 10.5m, in 1, 2 and 3 section configuration, the swaged rung and box section construction provides a ladder that is both robust and durable enough to stand up to the extremes of today's fireground conditions.

Specialist requirements for security and law enforcement services are fulfilled by a complete range of assault and special purpose ladders. Method Of Entry (MOE), multi-role and boat boarding variants form just a part of the BAYLEY police range.

A wide selection of ancillary equipment, such as strainer baskets, fire beaters and sit down-strap on' BA stowage brackets complements the ladder range. The Baylink system of interchangeable tool heads and shafts provides the facility to choose the right tool, at the right length, for any requirement. It also assists with the stowage problems that this equipment can sometimes cause.

The PAC range of stowage brackets and tool mounts has become a firm favourite with numerous UK fire brigades. Produced in an assortment of indestructible ballistic nylon and hytel compounds, these mounts offer unlimited retention options for all types of equipment, particularly larger items that have, in the past, been difficult to stow securely. The latest addition to the range, the cylinder mate, offers firm and safe storage for BA cylinders, particularly composite cylinders that are prone to damage to the outer wrapping, and can prove expensive to replace.

The stowaway ladder was developed from the tried and tested range of BAYLEY roof ladders. This versatile ladder covers a multitude of uses, whilst having the ability to be easily stored in a car boot or stowage compartment of an emergency vehicle. It is produced with options for 3 extended lengths and 2 different widths, and is also available in either plain aluminium or matt black powder coat finish. The standard 3.7m ladder has an assortment of accessories available, which includes abseil brackets, fast roping kits and even dog rungs.
